

FRESKA

FRESKA: the new universal solution for supermarkets

FRESKA is a revolutionary machine, designed to package all types of trays available on the market without the need for custom moulds. The film adheres to any product, with or without a tray.

The machine also makes it possible to package all types of film and bags.

Ideal for packaging meat and every type of food product.

FRESKA allows 2 rolls to be installed at the same time (even with different characteristics!), always ready for use. This saves time whenever the roll is changed.

FRESKA 3 machines in 1

- **Tray sealer:** universal mould-free sealing, with any type of tray, including cardboard trays.
- **Stretch dispenser:** wraps any product with recyclable film, with any type of tray or without a tray.
- **Sealer:** creates any bag shape and seals any material.

TECHNICAL SOLUTIONS

- **Ultra-high-performance steel heating elements:** 50% reduction in shrinking time and 60% reduction in heating time.
- **Soft Shrink fan speed adjustment:** perfect shrink-wrapping even on very light or flexible products. The seals do not open. Very low noise level. Exclusively patented.
- **Comfort Zone Fan Stop:** fan stop is a “green” solution that enables 20% energy savings and greater

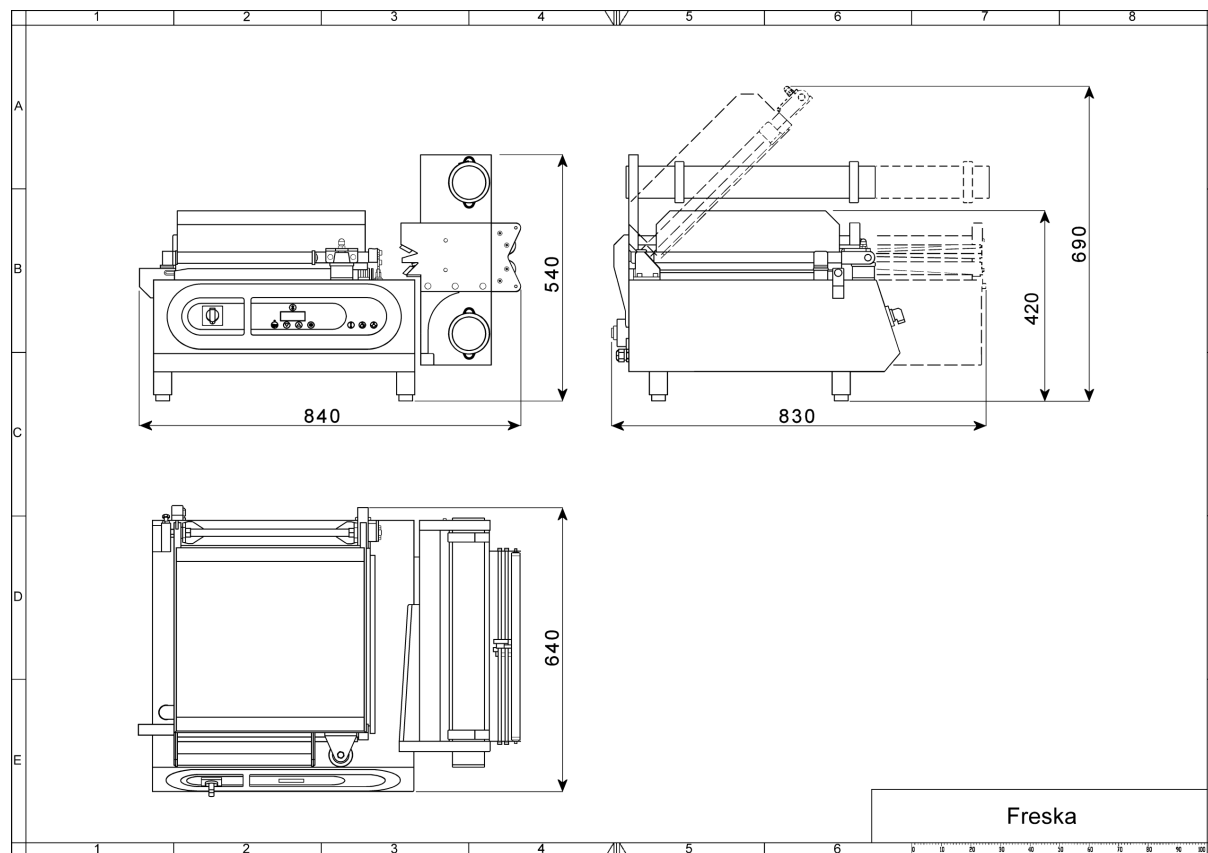

operator comfort during packaging, as the fan stops at the same time as the chamber opens.

- **New latest-generation control board:** quality components. 4-digit display.

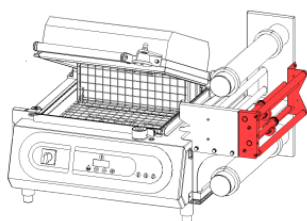

Technical data

Power supply	230V 50/60Hz 1Ph
Maximum installed power	2 kW (230V)
Maximum electrical absorption	8,6 A (230V)
Hourly production (variable depending on the type of film and the size of the product)	0-300 p/h
Maximum roll dimensions	Ø170x380 mm (nr. 2)
Mass dimensions of the product (the measurement of mass cannot be ottenute contemporaneously)	350x240x140 mm
Machine dimensions (hood open)	840x640x690 mm
Machine dimensions (hood closed)	840x640x540 mm
Machine weight (net/gross)	54/68 kg

Layout and technical data sheets

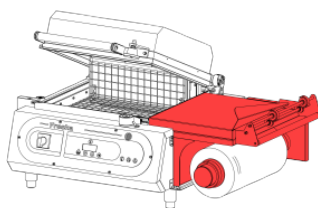

Optional

One-side micro-perforator kit Freska

KR380008

The kit allows the film to be micro-perforated only on the lower side, ensuring impermeability on the upper part of the pack. It is ideal for packaging food in trays.

Reel support kit Freska

KR38B001

This optional, consisting of a stainless steel packaging plate and reel support, allows reels with max. diameter 200 mm and max. width 380 mm to be used.
